PROFESSIONAL SUMMARY

Data Analyst with internship experience in **SQL, Python, Power BI, and Excel**, skilled in ETL, data cleaning and validation, exploratory analysis, DAX, and dashboard reporting. Analyzed **100K+ order** datasets with advanced SQL (CTEs, window functions) and automated reporting that cut processing time by **35%**. Seeking a Data Analyst role to turn business data into clear KPIs and decisions.

PROFESSIONAL EXPERIENCE

Data Analyst Intern — Labmentix Pvt. Ltd. (Remote) Feb 2025 – May 2025

- Engineered automated **ETL pipelines** in **Python** and **SQL**, reducing weekly data processing time by **35%**.
- Built **Power BI** dashboards and **DAX** measures for revenue and profitability reporting, replacing **4** recurring Excel reports and saving **~6 analyst-hours per week**.
- Performed exploratory data analysis and data validation, and aligned KPI definitions across teams to ensure consistent, accurate business reporting.

PROJECTS

E-Commerce Business Analytics / *SQL • MySQL • Python • Power BI*

- Designed an end-to-end SQL analytics pipeline for **100,000+ orders** across **9** relational tables, covering data cleaning, transformation, and validation.
- Used **CTEs, window functions** (RANK, LAG, NTILE), stored procedures, and joins for **RFM segmentation**, Pareto revenue analysis, and **cohort retention**; found that the top 5 categories drove **62%** of revenue.
- Built a Power BI drill-through dashboard to trace delivery-delay root causes by category and seller, turning findings into a prioritised category-level action plan.

Resilytics — AI Business Intelligence Platform for SMBs / *Python • SQL • FastAPI • PostgreSQL*

- Built a SaaS platform end to end **as the sole engineer** (Aug 2025 – Jun 2026) that ingests raw business datasets, cleans and validates them through automated schema-checked pipelines, and generates revenue diagnostics and improvement recommendations.
- Implemented financial and statistical risk models — **Altman Z-Score, HHI concentration index, Value-at-Risk (VaR-95)**, and a custom **Revenue Quality Score** — to flag where a business is losing revenue and which areas need attention.
- Ran a **multi-phase accuracy audit** on a synthetic company dataset to validate risk scores and AI Copilot (Gemini API) answers; stack: FastAPI, PostgreSQL, Redis, DuckDB, React + TypeScript.

Retail Sales Intelligence Dashboard / *Power BI • DAX • Excel*

- Modeled retail sales data into a **star schema** and built a **4-page** interactive Power BI dashboard analyzing **₹29.4L** in sales.
- Developed **YoY growth** DAX measures, KPI cards, dynamic slicers, and a **decomposition tree** for regional and category-level root-cause analysis.
- Identified underperforming regions and categories and recommended targeted fixes on pricing, stock focus, and regional sales effort.

TECHNICAL SKILLS

Languages & Querying: SQL (MySQL, PostgreSQL, MS SQL Server), Python (Pandas, NumPy, Scikit-learn)

Business Intelligence: Power BI, DAX, Tableau, Advanced Excel (Pivot Tables, Power Query), Data Visualization

Analytics & Data Science: EDA, Data Profiling, Statistical Analysis, Hypothesis Testing, Predictive Modeling, RFM, Cohort Analysis, Trend Analysis

Data Engineering: ETL Pipelines, Data Validation, Data Modeling (Star Schema), Data Warehousing, DuckDB

Tools: Git/GitHub, FastAPI, Jupyter, VS Code

EDUCATION

Post Graduate Program in Data Science & Analytics — Imarticus Learning, Pune Aug 2025 – Jun 2026

B.Tech in Computer Science (AI & ML) — KIT's College of Engg., Kolhapur | CGPA 7.45 2021 – 2025

ACHIEVEMENTS & CERTIFICATIONS

- 8th Rank (Top 5%)** among 150+ participants — Imarticus Data Science Hackathon, Apr 2026.
- Data Analysis with Python — Forage | ML & NLP Bootcamp — Udemy | ML & AI Workshop — IIT (BHU) Varanasi.
