

85%	R ² 0.97	7,000+	LLM	Top 5%
churn model accuracy	forecast fit	customer records modelled	copilot, audited	DS hackathon

PROFESSIONAL SUMMARY

AI/ML Engineer with a B.Tech in Computer Science (AI & ML) who builds models end to end — feature engineering, model selection, honest evaluation and deployment behind APIs. Built an **XGBoost** churn model with **85%** test accuracy, time-series forecasters (**R² 0.97**), computer-vision pipelines with **YOLO** and **OpenCV**, and an **LLM copilot** whose answers were validated in a multi-phase accuracy audit. Seeking an AI/ML Engineer role building reliable, production-minded ML and LLM systems.

PROFESSIONAL EXPERIENCE

Founder & Sole Engineer (Independent Project) — Resilytics Aug 2025 – Jun 2026

- Built an **AI Copilot** on the **Gemini API** that answers questions about a business’s data, served through **FastAPI**.
- Ran a **multi-phase accuracy audit** on a synthetic company dataset to validate risk scores and Copilot answers before trusting them.
- Implemented a **Monte Carlo** simulation and shock-testing engine with **VaR-95**, **HHI** and a modified **Altman Z-Score**; stack: Python, PostgreSQL, Redis, DuckDB.

Data Analyst Intern — Labmentix Pvt. Ltd. (Remote) Feb 2025 – May 2025

- Built an **XGBoost churn-prediction model** on **7,000+** telecom customer records, achieving **85%** test accuracy.
- Used feature-importance analysis to surface the **top 3 churn drivers**, adopted by the retention team.
- Automated the **Python + SQL ETL** feeding the model, cutting weekly data-processing time by **35%**.

PROJECTS

Customer Churn Prediction | XGBoost • Scikit-learn • Streamlit

- End-to-end pipeline: EDA, feature engineering and a tuned **XGBoost** classifier (**85%** test accuracy) with an interactive **Streamlit** demo; month-to-month contracts showed **~3×** higher churn probability.

Yes Bank Stock Price Forecasting | Time Series • SARIMA • Random Forest

- Compared **ARIMA**, **SARIMA** and **Random Forest** on 15 years of monthly prices; SARIMA gave the best forecast, Random Forest reached **R² = 0.97** (MAE ₹14.96, RMSE ₹23.57).

Helmet Detection | Computer Vision • YOLO • OpenCV

- Detects two-wheeler riders and classifies helmet use from road video: **OpenCV** frame sampling → **YOLO-family** detector → rider-helmet matching → event log.

Vehicle Classification & Counting | Computer Vision • YOLO • Object Tracking

- Detects and classifies vehicles (car, bike, bus, truck) and counts line crossings, using **multi-object tracking** to avoid double counts and output a time-series table.

TECHNICAL SKILLS

Machine Learning: Scikit-learn, XGBoost, LightGBM, Random Forest, TF-IDF, Feature Engineering, Model Evaluation, Time Series (ARIMA/SARIMA)

AI & LLMs: LLM APIs, Gemini, Prompt Engineering, Tool Calling, RAG, AI Agents, AI Workflow Design; Claude Code, OpenAI Codex

Computer Vision: YOLO, OpenCV, Object Detection, Multi-Object Tracking

Data & Programming: Python, SQL, Pandas, NumPy, Statistics, Data Validation, ETL

Serving & Tools: FastAPI, REST APIs, Streamlit, PostgreSQL, Redis, Docker, Git/GitHub

EDUCATION

Post Graduate Program in Data Science & Analytics — Imarticus Learning, Pune Aug 2025 – Jun 2026

B.Tech in Computer Science (AI & ML) — KIT's College of Engg., Kolhapur | CGPA 7.45 2021 – 2025

ACHIEVEMENTS & CERTIFICATIONS

- 8th Rank (Top 5%)** among 150+ participants — Imarticus Data Science Hackathon, Apr 2026.
- ML & NLP Bootcamp — Udemy | ML & AI Workshop — IIT (BHU) Varanasi | Data Analysis with Python — Forage.
