35%	0.84	1,000	99K+	Top 5%
faster data processing	churn model ROC-AUC	job postings analysed	e-commerce orders in SQL	DS hackathon, 150+

PROFESSIONAL SUMMARY

Data Science & Analytics fresher (B.Tech AI & ML, PG in Data Science & Analytics) with internship experience in **SQL**, **Python** and **Power BI**. Builds end-to-end projects: a job-market analysis of **1,000** postings with a live dashboard, a churn model at **0.84 ROC-AUC**, and a deployed BI platform. Cut reporting time by **35%** as an intern and placed **top 5%** in a 150+ participant data science hackathon. Open to Data Analyst, Business Analyst and Junior Data Scientist roles across India.

PROFESSIONAL EXPERIENCE

Data Analyst Intern — Labmentix Pvt. Ltd. (Remote) **Feb 2025 – May 2025**

- Built automated **ETL pipelines** in **Python** and **SQL**, cutting weekly data processing time by **35%**.
- Built **Power BI** dashboards and **DAX** measures for revenue and profitability reporting, replacing **4** recurring Excel reports and saving **~6 analyst-hours per week**.
- Ran **EDA** and data validation checks, and aligned KPI definitions with stakeholders so teams reported from one consistent set of numbers.

PROJECTS

India Data Analyst Job Market Tracker | GitHub / *Python • SQL (DuckDB) • Streamlit • Plotly*

- Collected **1,000** Indian analyst job postings and cleaned them into **560** unique records, extracting role, seniority, experience asked, **20 skills** and salary with Python regex rules spot-checked against source text.
- Analysed the data in **SQL** views and a live **Streamlit** dashboard: only **12.5%** of analyst postings are fresher-friendly; fresher roles ask for SQL and Excel (**55%** each) and Power BI (**33%**).

Customer Churn Prediction System | Live app / *Python • XGBoost • SHAP • Streamlit*

- Trained an **XGBoost** model on **7,032** telecom customers reaching **0.84 ROC-AUC** and **88% recall** on churners, tuned to catch at-risk customers rather than maximise accuracy.
- Covered cleaning, EDA, feature engineering and evaluation; deployed as a live app that scores a customer and shows the main churn drivers.

E-Commerce Business Analytics / *SQL • MySQL • Python • Power BI*

- Built an SQL pipeline over **99K+ orders** across **9** tables; used **CTEs** and **window functions** for RFM segmentation, cohort retention and Pareto analysis — top 5 categories drove **62%** of revenue.

Resilytics — AI Business Intelligence Platform | resilytics.in / *Python • SQL • FastAPI • PostgreSQL*

- An innovative data + AI project: a live BI platform that validates raw business data and outputs risk scores (**Altman Z-Score, HHI, VaR-95**) and ranked revenue recommendations, with a back-testing gate on forecasts.

TECHNICAL SKILLS

Programming & Data: Python (Pandas, NumPy, Scikit-learn, XGBoost), SQL (MySQL, PostgreSQL, DuckDB — CTEs, window functions, joins)

Data Science: EDA, Statistical Analysis, Hypothesis Testing, Feature Engineering, Classification, Regression, Model Evaluation

BI & Reporting: Power BI, DAX, Power Query, Advanced Excel (Pivot Tables, XLOOKUP), Streamlit, Plotly, Star-Schema Modelling

Analytics: ETL, Data Cleaning & Validation, Cohort & RFM Analysis, Root-Cause Analysis

Tools: Git/GitHub, Jupyter, FastAPI

EDUCATION

PG Program in Data Science & Analytics — Imarticus Learning, Pune **Aug 2025 – Jun 2026**

B.Tech in Computer Science (AI & ML) — KIT's College of Engineering, Kolhapur | CGPA 7.45/10 **2021 – 2025**

ACHIEVEMENTS & CERTIFICATIONS

- **8th Rank (Top 5%)** among 150+ participants — Imarticus Data Science Hackathon, Apr 2026.
- **Certifications:** Data Analysis with Python — Coursera | Data Analysis & Visualization — Udacity | ML & NLP Bootcamp — Udemy | ML & AI Workshop — IIT (BHU) Varanasi.
